Course Duration: 1 Day

Price Per Delegate: £245
(Public Scheduled Course)

Price Per Course: £745
(On-Site at Customer Premises)

Suitable For:

Those who need to produce complex analysis of single and multiple data sets in order to present and manipulating data using Pivot Tables and Pivot Charts.

Learning Outcomes:

At the end of the course delegates will be able to use multiple data sources and produce calculations in PowerPivot and manage Pivot Table and Pivot Chart outputs with slicers.

Prerequisite Skills:

Delegates attending this course should have an advanced understanding of working with Excel including using Functions and Formulas. A sound working knowledge of Pivot Tables and Related Databases is desirable but not essential.
